EDUCATION

University of Texas at Dallas
Bachelor of Science in Computer Science

May 2023-December 2025

University of Texas at Dallas
Master of Science in Computer Science (Data Science Track)

Expected Fall 2026

EXPERIENCE

4MINDSAI INC

Dallas, TX

Frontend engineer – Full Time

April 2025-Present

- Designed UI/UX mockups and interactive prototypes in Figma, cohesive user flows and visual design systems across products.
- Led frontend development for AI-driven web applications using React and TypeScript, building responsive, accessible interfaces optimized for scalability and user engagement.
- Built and maintained backend services using Python, FastAPI, PostgreSQL, and SQLAlchemy, implementing RESTful APIs, authentication, session flows, and optimized database queries.
- Contributed to prompt engineering by writing and optimizing prompts for improved LLM responses and user-facing AI interactions.
- Conducted QA testing across frontend (React/TS) and backend (FastAPI) components, uncovering edge cases and performance issues; worked with engineers to implement fixes and strengthen overall system reliability
- Collaborated directly with founders, engineers, and product stakeholders to translate business requirements into scalable technical solutions and development roadmaps.
- Researched LLM core concepts and contributed to counts of white papers regarding the company's findings and innovations
- Contributed 21K+ lines of production TypeScript/React code across 65+ feature commits over 3 months, maintaining 95%+ test coverage and zero regression bugs.
- 40% reduction in component re-render overhead through react memoization, lazy loading, state normalization techniques, and etc.
- Architected conversational UI for the chatbot with LaTeX math rendering using React, Typescript, Redux Toolkit, and KaTex, supporting 50K+ daily AI-powered interactions

State Farm

Richardson, TX

Software Engineer - Internship

May 2023-Aug 2024

- Utilized Postman to enhance and rigorously test the Quote UI, ensuring robust performance and a seamless user experience.
- Delivered clear, impactful presentations on development progress and technical outcomes to engineers, managers, and business stakeholders.
- Optimized Quote UI code efficiency and formatting using Gosu and TypeScript, while maintaining comprehensive test coverage.
- Designed and implemented a multi-stage GitLab CI/CD pipeline, automating build, test, and linting processes to streamline workflows.
- Competed in a Capture The Flag cybersecurity competition, showcasing hands-on security expertise and problem-solving skills.
- Participated in the DeepRacer machine learning competition, leveraging AWS to train and optimize an autonomous robotic model.
- Developed innovative solutions during Hack Day events to simplify API access and improve internal tools and processes.
- Executed thorough unit and integration testing using Jest to ensure high code quality and system reliability.

Arcafeed

Remote

Full Stack Web Developer – Internship

Sept 2022-Dec 2022

- Translated high-fidelity Figma designs into responsive, pixel-perfect interfaces using React, HTML, and CSS.
- Developed a fully functional and user-friendly sign-up page, focusing on clean UI, accessibility, and seamless user experience. Collaborated with designers and backend developers to ensure smooth integration and performance across devices and browsers.

- Gained experience in startup-level web development processes, agile collaboration, and UI implementation best practices

Webzie Web Design

Plano, TX

Web Designer, Developer, and Founder

June 2022-Sept 2023

- Founded and managed a freelance web design studio, delivering custom websites tailored to individual client needs and business goals.
- Designed and developed responsive websites using HTML, CSS, and JavaScript, ensuring clean code and optimal performance.
- Conducted cross-browser and cross-device testing to guarantee consistent functionality and a seamless user experience.
- Collaborated directly with clients to gather requirements, present prototypes, and iterate on feedback to deliver high-quality, user-centered solutions.
- Managed end-to-end project lifecycles, from concept and design to deployment and maintenance.

CERTIFICATIONS

AWS Cloud Practitioner, Microsoft 360 Specialist, XGAL001 Stanford UX/UI Design, and NCL

PROJECTS

Review Sentiment Classifier — Python

- Built a sentiment analysis classifier using XGBoost to categorize movie reviews as positive or negative with high binary classification accuracy.
- Processed and analyzed textual review datasets to evaluate machine learning model performance and prediction quality.

Activation Functions Analyzer — Python

- Built a program to analyze neural network activation functions by training models with varying hyper-parameters, comparing Sigmoid, Tanh, and ReLU to understand their performance and behavior.

Pharmacy Inventory Management — Python

- Created a private inventory management system for a pharmaceutical company that updates stock levels automatically by scanning product barcodes and syncing data with Google Sheets API.

Climo - Typescript, Javascript, Python

- Developed a real-time disaster monitoring and emergency response platform using machine learning and geospatial analysis.
- Built features including a live disaster dashboard, AI assistant, advanced filtering system, trend analytics, user authentication, and incident reporting workflows.
- Aggregated, classified, and visualized crisis events from real-time data sources to improve situational awareness and emergency response coordination.

AI Product Management Assistant — TypeScript, Slack API, Jira API, AI Integrations

- Developed an AI-powered product workflow assistant integrating Slack and Jira APIs to streamline product management and engineering collaboration.
 - Built functionality for translating conversations, requirements, and planning discussions into structured development tasks and Jira workflows.
 - Designed automation flows to improve task organization, developer communication, and cross-functional project visibility within startup environments.
 - Researched MCP-based integrations and AI-assisted workflow orchestration for scalable internal productivity tooling.
-

ADDITIONAL INFORMATION

Eligibility: US Citizen, Eligible to work in the US for internships and full-time with no restrictions.
Skills:

- **Programming Languages:** C++, PyTorch, NumPy, Java, HTML, CSS, JavaScript, Python, C, TypeScript, SQL, React
- **Database Management:** MySQL, PostgreSQL
- **Frameworks & Libraries:** React, Node.js, FastAPI, Redux Toolkit, PyTorch, NumPy
- **Tools & Technologies:** Git, GitLab CI/CD, Postman, AWS, Docker
- **Design & Development:** UX/UI Design, WordPress, Figma, Adobe Creative Suite
- **API Integration:** REST APIs, GraphQL
